Scientists j. _____ (train) AI systems using massive amounts of data, and these systems can now identify patterns more accurately than before. By the time some AI models are released to the public, researchers k. _____ (test) them for several years.

AI has also changed the workplace. Many companies currently
l. _____ (replace) repetitive tasks with automated systems. As a
result, some employees worry that machines m. _____ (take) over
their jobs in the future. Nevertheless, experts argue that AI will also create new career
opportunities.

In the healthcare industry, doctors n. _____ (use) AI tools to
assist with medical diagnoses. Researchers recently o. _____
(discover) that certain AI programs can detect diseases more quickly than humans in some
situations. Scientists are now examining how these technologies can be improved further.

Concerns about AI safety have increased in recent years. Governments and
technology companies p. _____ (discuss) regulations to ensure that
AI systems are used responsibly. By the end of this decade, many countries
q. _____ (introduce) stricter laws regarding the development of
artificial intelligence.

People continue to debate whether AI will benefit humanity in the long term. Some
experts believe that intelligent machines r. _____ (solve) major
global problems, while others fear that they may create new risks. Despite these concerns, AI
technology s. _____ (advance) rapidly, and researchers around the
world t. _____ (continue) to explore its possibilities.

(20 marks)
