

**FINAL EXAMINATION****BACHELOR OF ACCOUNTANCY (HONOURS)****COURSE : INVESTMENT ANALYSIS****COURSE CODE : FIN4243****DURATION : 3 HOURS****INSTRUCTIONS TO CANDIDATES:**

1. This question paper consists of **FOUR (4)** questions.
2. Answer **ALL** questions in the Answer Booklet provided.
3. Please check to make sure that this examination pack consists of :
 - i. The Question Paper.
 - ii. An Answer Booklet.
 - iii. Appendix 1-4.
4. Do not bring any material into the examination hall. The use of a calculator is allowed.
5. Please write your answer using permanent ink.

This question paper consists of 8 printed pages including the front page.

QUESTION 1

- a. Investors often face different financial goals, investment horizons, and risk preferences when constructing their portfolios. A financial planner is advising three clients regarding their investment decisions.

Mr. Adam, aged 26, has recently started his career and intends to accumulate wealth for retirement over the next 30 years. Ms. Farah, aged 45, wishes to balance capital growth with a steady stream of income to support her children's future education expenses. Meanwhile, Mr. Kumar, aged 67, is a retiree who depends on his investments to generate stable income while preserving his capital.

Required:

- i. Evaluate **ONE (1)** suitable investment instrument for each investor by discussing the relationship between risk and return. (6 marks)
- ii. Explain how investment horizon influences portfolio construction. (2 marks)
- b. Farhan has recently inherited RM200,000 and intends to invest the entire amount in Bursa Malaysia. After conducting his own research, he plans to allocate the funds across four investments with different expected returns. The investments are as follows:

Asset Class	Amount Invested (RM)	Expected Return (%)
Equity fund	70,000	18
Bond fund	50,000	12
Reit fund	40,000	9
Money market fund	40,000	6

At the end of the year, the actual return achieved by the portfolio was 10%.

Required:

- i. Based on the information above:
- a. Evaluate the expected return of the portfolio. (4 marks)
- b. Assume that the portfolio has a beta of 1.10. The risk-free rate is 4%, and the expected market return is 11%. Determine the required rate of return of the portfolio using the Capital Asset Pricing Model (CAPM). (2 marks)

- c. Assess the actual return with the expected return and the portfolio's performance
(3 marks)
 - ii. Explain **TWO (2)** reasons why actual portfolio returns may differ from expected returns.
(2 marks)
 - c. The Malaysian stock market is exposed to numerous economic, political, and financial developments that may influence investors' returns. While diversification can reduce certain risks, some risks remain unavoidable. Evaluate on **THREE (3)** systematic risks that may affect investment portfolios and how each risk could influence portfolio performance.
(6 marks)
- (Total: 25 marks)

QUESTION 2

- A. Investors commonly rely on both fundamental analysis and technical analysis when evaluating investment opportunities. While fundamental analysis focuses on the intrinsic value of a company, technical analysis attempts to predict future price movements based on historical market data.

Required:

Explain **FOUR (4)** differences between fundamental analysis and technical analysis.
(8 marks)

- B. Nexus Manufacturing Berhad is a well-established company listed on Bursa Malaysia. The company has recently expanded its operations into several ASEAN countries, and management expects this strategic expansion to contribute positively to future earnings and dividend growth. As a result, many investors have shown interest in the company's shares.

Hakimah, an individual investor, is currently evaluating whether the shares of Nexus Manufacturing Berhad are fairly valued. She has gathered several pieces of information from the company's latest annual report and market data. The company's shares are currently valued by the market at a Price-Earnings (P/E) ratio of 11 times. The company has 18 million ordinary shares outstanding and reported earnings after interest and tax of RM81 million for the most recent financial year. Nexus Manufacturing Berhad recently paid a dividend of RM2.80 per share, and Hakimah's required rate of return for investments with similar risk characteristics is 14%.

Required:

- a. Evaluate the intrinsic value of the stock under each of the following assumptions:
- i. Dividends remain constant indefinitely.
(1 mark)
 - ii. Earnings are expected to increase by 10% next year.
(4 marks)
 - iii. Dividends are expected to grow at a constant rate of 8% per annum indefinitely.
(2 marks)
 - iv. Dividends are expected to grow at 16% annually for the first two years, followed by 10% annually for the next three years, before stabilising at 6% indefinitely.
(7 marks)

- b. Based on your answer in (a)(iv), determine the expected stock price at the beginning of Year 9.
(5 marks)
- c. If the stock is currently trading at RM105 per share, advise Hakimah whether she should invest in the stock or not. Justify your answer.
(3 marks)

(Total: 30 marks)

QUESTION 3

- A. Fixed-income securities are popular among investors seeking stable income and lower levels of risk. However, the market value of bonds can fluctuate significantly due to changes in economic and financial conditions.

Required:

Explain **THREE (3)** factors that influence bond prices and discuss how each factor affects bond investors.

(6 marks)

- B. Six years ago, Alpha Energy Berhad issued a 12-year callable bond with a face value of RM1,000 and an annual coupon rate of 8%, payable semi-annually. The bond is currently traded at RM1,070. The prevailing market interest rate is 6%.

The bond contains a call provision that allows the issuer to redeem the bond after three years at a call price of RM1,100.

Required:

- a. Evaluate the following:
- i. Value of the bond based on current market interest rates. (3 marks)
 - ii. Value of the bond if it is called in three years. (3 marks)
 - iii. Current yield of the bond. (1 mark)
 - iv. Yield-to-Maturity (YTM). (2 marks)
 - v. Yield-to-Call (YTC). (3 marks)
- b. From the issuer's perspective, evaluate whether Alpha Energy Berhad is likely to exercise the call provision. (2 marks)

(Total: 20 marks)

QUESTION 4

- A. Convertible bonds are frequently used by companies as a financing instrument because they combine characteristics of both debt and equity securities.

Required:

- a. Describe with an example why convertible bonds are considered hybrid securities.
(2 marks)
- b. Elaborate on **THREE (3)** disadvantages of investing in convertible bonds compared with ordinary shares and straight bonds.
(6 marks)

- B. SolarTech Berhad, a company involved in the renewable energy industry, recently issued RM100 million worth of convertible callable bonds to finance the development of several large-scale solar energy projects throughout Malaysia. The bonds have a face value of RM1,000 each and carry an annual coupon rate of 5%. The bonds will mature in 10 years and are currently traded in the market at RM950 per bond.

Under the terms of the issue, each bond may be converted into 20 ordinary shares of SolarTech Berhad. The company's shares are currently traded at RM48 per share. The prevailing market interest rate for similar-risk bonds is 8%.

Required:

- a. Evaluate the following:
- i. Conversion price.
(2 marks)
 - ii. Conversion value.
(2 marks)
 - iii. Conversion parity.
(2 marks)
 - iv. Conversion premium in ringgit and percentage terms.
(2 marks)
 - v. Theoretical value of the convertible bond using the market interest rate.
(4 marks)
 - vi. Total number of ordinary shares that would be created if all bonds were converted.
(1 mark)

- b. Explain the minimum value of the convertible bond. (2 marks)
- c. Assume that SolarTech Berhad intends to force the conversion of the bonds and offers bondholders a call compensation equivalent to one year's coupon payment. Based on the information provided, explain whether investors should convert the bonds into ordinary shares or accept the call compensation. (2 marks)

(Total: 25 marks)

(TOTAL: 100 MARKS)
